

BENEFITS

- › A750 Lounge provides the perfect solution for supporting various forms of Smart Working, with its luxurious and generously dimensioned places for relaxing, meeting and working together
- › The Lounge workspace gives the user a feeling of security and privacy in the open workplace, increases personal comfort and provides visual serenity
- › Quick and easy to modify for every posture thanks to the electrically adjustable chairs and tables, without making any concessions in terms of ergonomic standards and guidelines
- › Great variety of modules: fixed, adjustable and corner units together with tables of various dimensions that are either of a fixed height or adjustable
- › Units can be placed freestanding in an area, but also against a wall or back-to-back
- › A streamlined design with electrical components, motors and cables which are incorporated beneath the deck and behind the backrest of the chair
- › Recyclable wooden frame, foam and steel components. All standard Ahrend fabrics and leather available, including any combination thereof
- › Winner of a Good Industrial Design Award

The Ahrend logo consists of a red stylized icon above the word "ahrend" in a lowercase, bold, sans-serif font.

_AHREND 750 LOUNGE

Designer **Bas Pruijser**

"An A750 work area has been designed with just as much care and specialist knowledge as an adjustable office chair and table. Ergonomics, standards and comfort likewise go hand in hand here. It's just that the work area provides more anonymity and you work here for a shorter period than normal."

BAS PRUIJSER

Corporate Social Responsibility

Ahrend aspires to become the sector's most sustainable company in Europe and has set itself the goal of closing the full production cycles and climate-neutral manufacturing by 2020, using the principles of Ecodesign and Cradle to Cradle. The efficient use (and reuse) of materials is the central focus of this goal.
