# Storage Systems

Pedestals

Despite all predictions, we are still waiting for the paperless office. To make this wait a bit more bearable TECHO has designed a range of storage systems that sit unobtrusively in the office environment. They will at least give you the illusion that paper is on the way out.

Lockers

Cabinets without doors

Our storage systems have been designed with functionality in mind rather than style. We have found that if you concentrate on functionality the appearance looks after itself. We wanted to get every possible cm<sup>3</sup> of storage space from these products – and that’s what we have achieved. We designed the cabinet range as a practical and convenient storage system that complements our desking ranges. During the design process particular attention was paid to the doors to ensure that access to the storage space is maximised. In the tambour and sliding door versions almost no space is wasted. Whichever model you choose, you are sure to appreciate the no-nonsense design, vast storage potential and high build quality of the TECHO cabinet range.

In combination with your desk pedestals create a functional and ergonomic workstation. To maximize user

convenience the pedestals are subject to continual development.

With the new generation of wooden pedestals TECHO is introducing three standards of user convenience.

The differences are hidden in the carcass in the form of the drawer runners and closing systems.

### Wooden pedestals Metal pedestals

wild pear	RAL9004 black
beech	RAL9007 gunmetal
grey	RAL9022 silver
white	RAL9010 white

**Type C** pedestals use standard drawer runners that we have been using to date.

There is a slight metallic sound that accompanies drawer opening/closing and drawers have a bit of sideways play.

Drawers on the **Type B** pedestals move on the Quadro drawer runner system, which ensures quiet movement. This means greater comfort for the user.

The **Type A** pedestals are also fitted with the Quadro drawer runner system, but in addition they have a damped closing system.

# Lockers

TECHO offers a range of lockers in standard or made to measure sizes. They provide a secure and convenient locker solution with a choice of locks depending on requirements. Made from MFC, they come in a variety of finishes and colours, and are easy to attached side-by-side to form banks of lockers.
